March 2, 2011

Ata Invest's Investor Conference in Istanbul
May 15-17th at Four Seasons Bosphorus
 One-on-Ones and Major Business Owners discussing Growth Strategies

Market Comment

Clear negative trading pattern expected today. Yesterday's closing was at the day's low and also more than 6% below the key 200 day MOV. The market may try to stabilize at around the 58,000 mark, but the drop will likely extend towards the 55,500 level in the short run.

What the Day Heralds

Decreasing trend in CNBC-e consumer confidence continues... The CNBC-e consumer confidence index in February shed 1.4% m/m to 106.72 for the second consecutive month. We view this not as a signal of slowdown in domestic demand, but rather in growth. The main reason for deterioration in the index may also be the recent unrest in Libya and the MENA region that is causing instability in the financial markets. However, it is worth mentioning that the index is still 7.0% above last year's level.

ICC data signals decline in February inflation... According to the Istanbul Chamber of Commerce (ICC) inflation index, monthly inflation rose by 0.57%, exceeding last year's 0.38%. The food sub-index of the ICC inflation, which has significant correlation with CPI's food inflation draws a more optimistic scenario rising 1.1%, lower than last year's 2.1% hike. Note that our call for February CPI, due on March 3, is a 1.0% m/m increase.

Increase in February TEA data... The Turkish Exporters Assembly (TEA) February data indicates that exports rose by 24.2% y/y to US\$ 10.2 bn, adding up to US\$ 117.5bn in the last 12 months. The automotive sector was the star performer of the month on US\$ 1.6 bn worth of exports. Note that our foreign trade forecast for February is a US\$ 4.7 bn deficit, composed of US\$ 9.8 bn of exports and US\$ 14.5 bn of imports.

11.9% unemployment rate in 2010... In 2010 the unemployment rate fell to 11.9%, thereby comparing favorably to the 14.0% of 2009. The labor force participation rate came in at 48.8%, exceeding the 47.9% observed in 2009, while non-farm unemployment in 2010 fell to 14.8% from 2009's 17.4% level.

Comment: The 2010 unemployment rate decreased to 11.9% from the previous year's 14.0%. Rigidity in Turkey's high unemployment rate, despite robust growth momentum is mainly due to structural problems of the Turkish economy. This raises the question of the sustainability of Turkey's high economic growth rate. The economy recovered sharply in 2010, but such a sound growth rate has failed to create sufficient jobs.

Hot money flows resulting in Lira appreciation in 2010 have increased cheap imports, thus benefiting job growth elsewhere, but causing Turkey's current account deficit to rise to US\$ 48.6 bn. The Central Bank has imposed measures to ease credit growth and prevent further Lira appreciation, which has registered partial success. However, these measures alone are unlikely to solve Turkey's unemployment problem. Further measures, including an easing of the tax burden on employers, and job market flexibility, must be introduced to truly address the jobless growth problem. (See our Macro Note: Labor Force Statistics- 2010 of March 1).

Banks give their verbal defense on Competition Board investigation... Banks began giving their verbal defense on Tuesday in the Competition Board's investigation into suspected irregularities regarding promotions given to companies to encourage them to open employee salary accounts. The competition board started the investigation on August 19, 2009. Among the 8 banks being investigated are Akbank <AKBNK TI>, Isbank <ISCTR TI>, Yapi Kredi <YKBNK TI>, Garanti <GARAN TI>, Halkbank <HALKB TI>, Finansbank <FINBN TI> and Denizbank <DENIZ TI>.

Akbank CEO Ziya Akkurt commented that the ISE banking index may fall by 20% with a possible US\$ 6-7 bn outflow should the Competition Board decide against the banks.

Comment: The Competition Board has decided in favor of banks in recent comparable cases, and we believe the probability of a similar outcome is also high in this case. Yet the issue may pressure banking stocks due to its large scope.

Company News

|--------------------|--------------|----------------------------|
| Aksa Enerji | N/R | Share Price: TL 4.4 |
| AKSEN TI | P/E: - | Target Share Price: - |
| Utilities | EV/EBITDA: - | Upside Potential: - |

Aksa Enerji <AKSEN TI>: Rights issue decision cancelled while amount of shares to be sold by Kazanci Holding revised up...

Having announced corporate action plans to increase the free float (rights issue and stake sale by Kazanci Holding) in December 2010, the company has made some revisions to these plans as of yesterday.

Accordingly, the shares that were subject to sale by Kazanci Holding are to be revised up to 68.9 mn nominally valued shares (11.93% of current capital) compared to 46.2 mn shares (8% of the capital) in the initial announcement. The transaction is expected to be executed some time in 2011 depending

on market conditions. Reportedly, the proceeds from the stake sale will be utilized to repay Kazancı Holding's and other group companies' debts to Aksa Enerji, which will be used for a capacity increase of existing power plants and new investments. Note that the current outstanding free float is 5.5%, which will potentially rise to ~17.5% once/if the transaction is completed.

On the other hand, the decision to increase the paid-in capital by TL 58.5 mn through a 10.13% rights issue will be cancelled.

|------------------|-------------------|------------------------------|
| Koza Gold | OUTPERFORM | Share Price: TL 18.05 |
| KOZAL TI | P/E: 9.7x | Target Share Price: TL 24.94 |
| Mining | EV/EBITDA: 5.2x | Upside Potential: 38% |

Koza Gold <KOZAL TI>: Discovery of new vein to increase resources...

Koza Gold has announced that ore production at the Kaymaz Gold Mine open pit had started as of yesterday, and that gold production at Kaymaz would start in 2H11 in line with previous guidance. On the other hand, in a new development the discovery of a new vein in the Kaymaz Hub was also announced, which will increase the resources of the hub.

|----------------------|----------------------|-----------------------------|
| Albaraka Turk | MARKETPERFORM | Share Price: TL 2.07 |
| ALBRK TI | P/E: 7.4x | Target Share Price: TL 3.02 |
| Banking | P/B: 1.1x | Upside Potential: 46% |

Albaraka <ALBRK TI> reports TL 43 mn net earnings for 4Q, in line with estimates...

Albaraka has reported TL 43 mn net earnings in its 4Q10 bank only financials, up 30% q/q. The announced figures are in line with the previously announced tax financials, and also with our estimate and the consensus estimate of TL 41 mn. Net profit for 2010 was TL 134 mn, up 27% y/y.

Growth intact... In the fourth quarter, Albaraka expanded its loan book by 15% q/q, exceeding the sector and our forecast. The deposit base grew by 11%, again higher than average deposit market growth. Overall, ytd loan and deposit expansion was 35% and 26% respectively.

Albaraka also continued to expand its security book by 15% q/q with the acquisition of revenue indexed bonds. Annual growth in securities reached 33%.

NII is strong... NIM improved to 4.7% from 4.5% in 3Q, bringing an 11% q/q rise in NII. The main reason for this improvement was the decline in the cost of the participation accounts. NII was at TL 316 mn for 2010, implying a 3% increase over 2009.

Meanwhile, fee income also rose by 3% q/q. Net trading & FX income shed 26% q/q, similar to most banks in the quarter. OPEX was in line with expectations at TL 54 mn, indicating a 9% q/q rise.

Asset quality continues to improve... The NPL ratio dropped to 3.0% in 4Q from 3.2% in the previous quarter. The bank also decreased its provisioning coverage to 85.7 from 90.8% a quarter earlier.

BoD announces dividend of TL 13.5 mn to be proposed to AGM... The announced figure indicates a 10% payout ratio and 1.2% dividend yield.

Overall, we find Albaraka Turk's 4Q operational performance satisfactory. Loan expansion and improvement in NIM and fee income are the main positives of the quarter.

Tupras <TUPRS TI> - Upward revision in RUP Investment Incentive Certificate...

Tupras announced yesterday that the investment incentive certificate has been increased from TL 2.3 bn to TL 3.9 bn after a recalculation concerning the cost of the project and the addition of construction & assembly costs. Note that this increase is not related to a change in the total costs of the project, but calculated based on the maximum projected investment amount, also reflecting a higher FX rate assumption.

The incentives include: I) VAT Exemption, II) Exemption of Custom Duties III) Tax Discounts (50% discount from Corporation Tax, up to 30% of the value of the project) and IV) Employers Social Insurance Payment Contribution. In line with the increase in the amount of incentives, the tax discounts have also risen. Investors will recall that Tupras had announced on January 10 an Investment Incentive Certificate worth TL 2.34 bn related to this upgrade project.

Turkcell <TCELL TI> - Court rejects Turkcell's appeal on ICTA' fine...

Turkcell has announced the court's rejection of its appeal against the ICTA decision to impose a fine amounting to TL 32 mn in June 2008. The fine is related to certain Turkcell campaigns that offered free

minutes on some of its packages. Turkcell had paid the amount following the notification and utilized the 25% discount option on early payment by making a TL 24 mn payment. The company is to lodge an appeal with a higher court.
